## 1. Introduction to PDF Maker Free

The PDF Maker is extension tool designed for vtiger CRM. There is already possibility of the export to pdf format in vtiger CRM functionality but it covers just few modules. In addition pdf templates are hardcoded and cannot be edited. Therefore, the intention was to provide powerful and flexible tool which allows users of vtiger CRM to create own pdf templates.

The PDF Maker Free benefits are:

- Personalized Invoice, Quotes, Sales Orders and Purchase Orders formats
- Personalized Product Profiles with image
- Terms and Conditions

### Product Features :

- You can use all Fields (including custom)
- Company and User information
- Translation from Global and Module languages
- Print from list view module
- Define Page format (A3, A4, A5, A6, Letter, Legal and own format is possible)
- Using Products images in Invoice, Quotes, Purchase or Sales Order

## 2. How to install PDF Maker Free

To install PDF Maker Free you have 2 options:

- install via vtiger Marketplace
- install via module manager

### 2.1. Install PDF Maker Free via module manager

To install PDF Maker Free via module manager you need to have installation .zip file. You can find Section to free downloads in our eshop. Please login or register into our eshop.

## PDF Maker FREE for vtiger CRM

### Most acknowledged extension to the vtiger CRM Open Source

The Free version allows you to create customized Quotes, Sales Orders, Purchase Orders and Invoices but only allows for 1 template. Although still very useful and powerful, the free version is limited but does give a feel for what it possible with paid versions.

How to install PDF Maker Free via module manager

After login you will see Free Downloads section.

Here you can download .zip file to install PDF Maker Free.

It is also useful to register because we will and more free extensions into this section.

How to update PDF Maker

## 4. Quick start

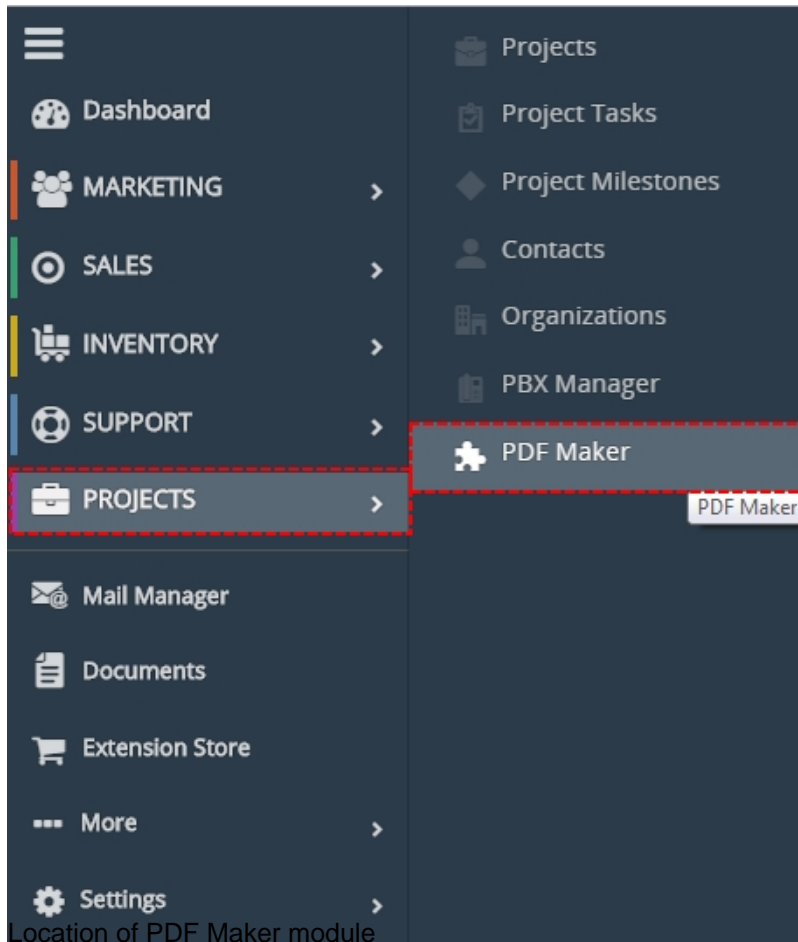

In the following section you can find short description how to edit your PDF template for vtiger CRM using PDF Maker.

### 4.1. Edit the PDF template

In order to edit the PDF template you have to start the PDF Maker tool which can be after installation located under the Projects as seen below on the picture.

1. In vtiger CRM menu please go to Projects and click on PDF Maker (since vtiger 7 there is no Tools part so records which used to be in Tools tab are in Projects tab now)

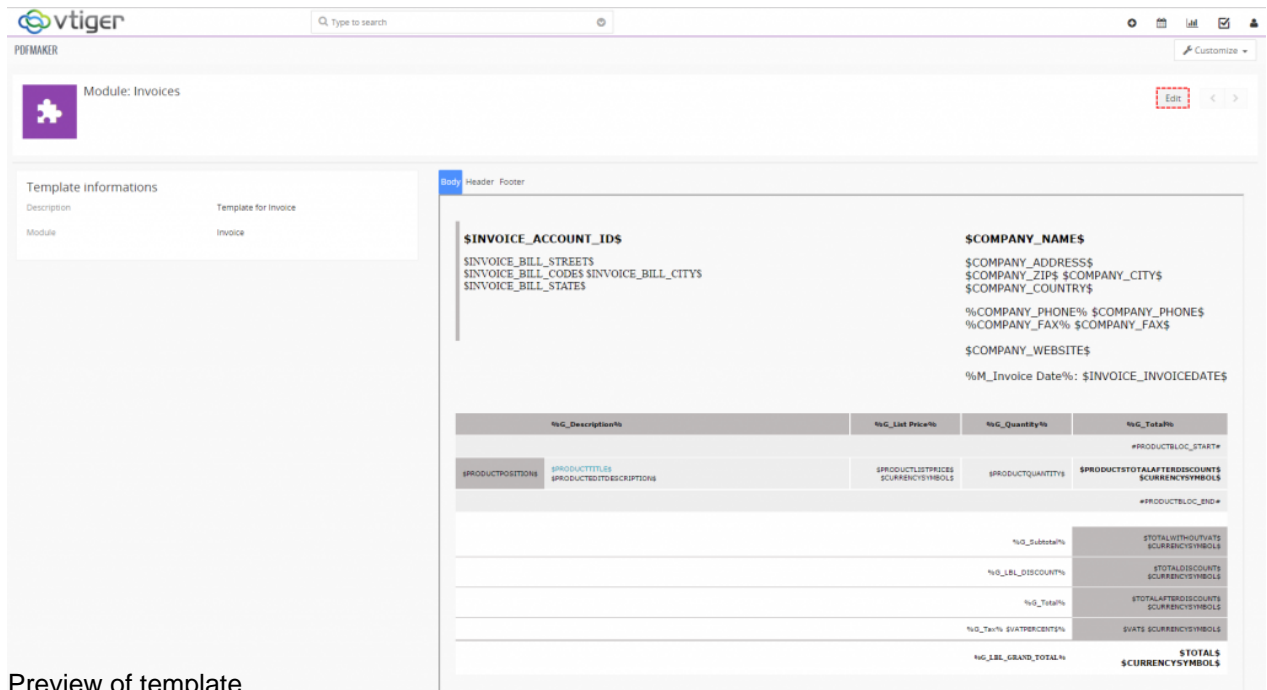

Location of PDF Maker module

2. The screenshot below shows PDF Maker ListView. You can click on template to see preview.

ListView of PDF Maker

3. In preview click on [Edit] to start editing templates

Preview of template

4. After editing click on [Save] button

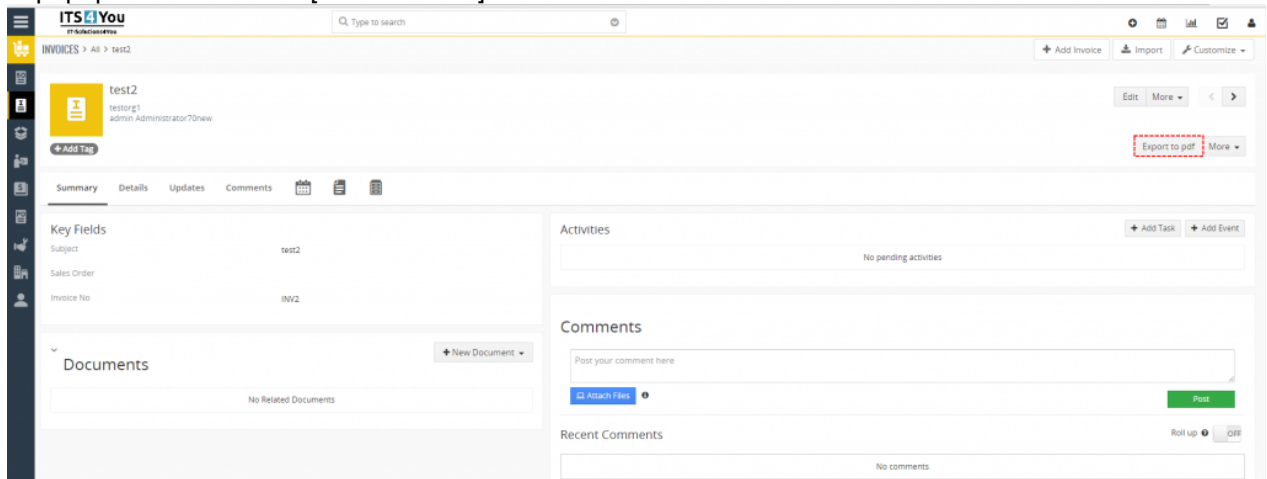

EditView and Save template

## 4.2. How to generate PDF file with PDF Maker template

With PDF Maker Free you can generate PDF file only from DetailView.

To generate PDF file please provide following steps:

1. To generate without changing default language click in DetailView of record on [Export to pdf] button and in popup window click on [Download file]

How to export PDF file

- First, if you want to change language of pdf file or add PDF Product Page Break or change PDF Product Images click on [More] button

How to export PDF file

3. Then click on [Download] or [Export to pdf] button

## 5. Work area

The Work Area of PDF Maker consists of:

- ListView – list of your templates
- DetailView – shows already created pdf template in details
- EditView – allows you to edit existing templates
- PDF Maker block – mainly used for export records to pdf file

### 5.1. ListView of PDF Maker Free

ListView of PDF Maker Free

The main part of the PDF Maker ListView consists of list of the PDF templates, which gives you information about a module and a short description.

Under customize button you can find:

- Upgrade PDF Maker
- Uninstall PDF Maker

There are also buttons to see PDF template details and Edit PDF template.

## 5.2. DetailView of PDF Maker Free

From ListView you can directly open any pdf template in DetailView. The DetailView consists of:

- Template information part – gives basic information of the template
- PDF template itself which consist of Header, Body and Footer part.
- [Edit] button – switch to EditView and start editing

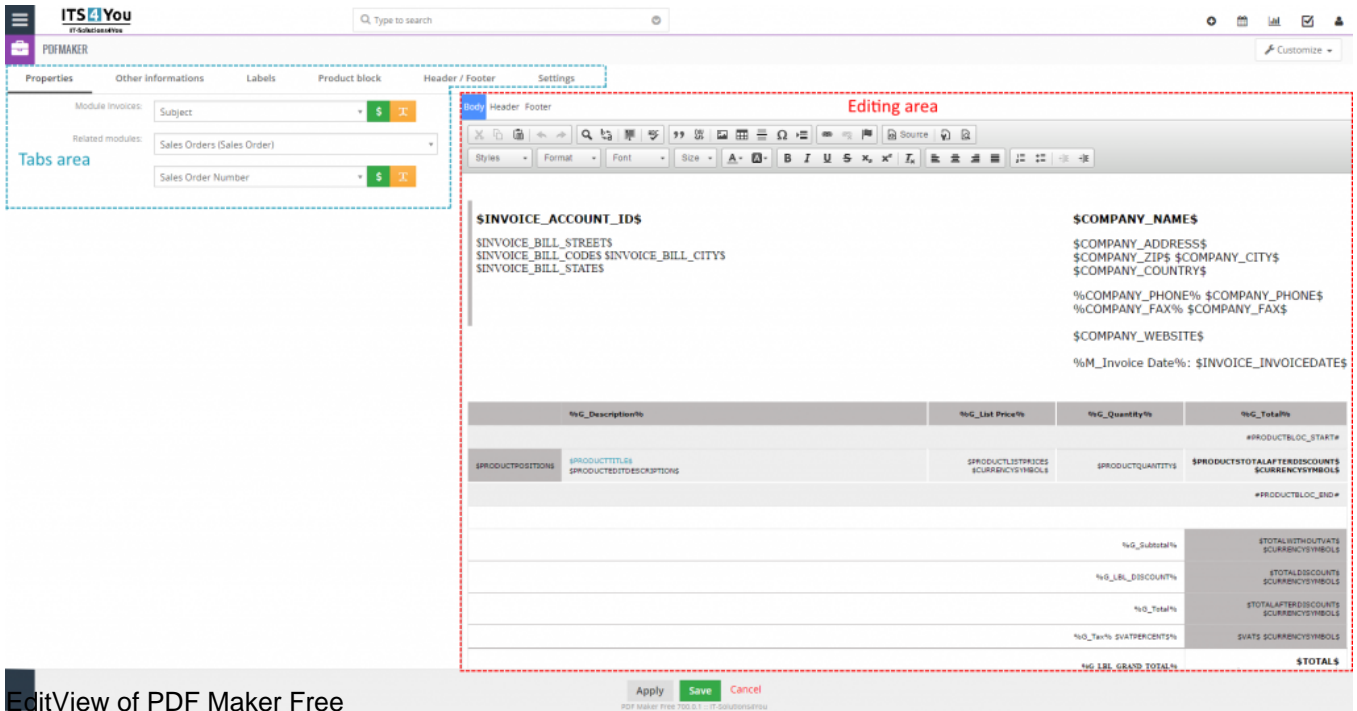

DetailView of PDF Maker Free

## 5.3. EditView of PDF Maker Free

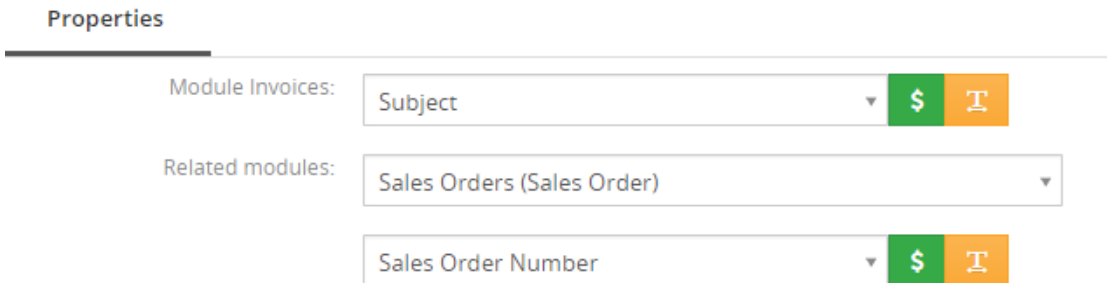

The EditView shown in the picture below is divided into two areas;

- **Tabs area** – allows user to insert into template different kind of values, fields, labels and to set up properties and other common settings of the pdf template. Tabs area consists of following tabs, which are described in the following subchapters:
  - Properties
  - Other informations
  - Labels
  - Product block
  - Header/Footer
  - Settings
- **Editing area** – is mainly used for inserting/editing your own text, tables, images etc. and to make some design adjustment of the template like font change, color, format, size, background color of the text etc. This editing can be initiated via many toolbars located inside three tabs (Body, Header and Footer) in the above part of Editing area.

### 5.3.1. Properties

The main purpose of the Properties tab is to add variables of module and related modules.

Properties

Name	Description
<b>Primary Module</b>	Template will be based and available only for one primary module and its fields.
<b>Related modules</b>	If exists related module(s) to selected module, it is possible here to select and use fields from any related modules.

### 5.3.2. Other information

As shown below Other informations tab contains several fields. They are Company and User information, Terms and Conditions, Current date, Barcodes, QR code and Custom functions.

**Other informations**

---

Company and User information:

name  \$

Terms and Conditions:  \$

Current date:  \$

Other information

Name	Description
<b>Company and User information</b>	Comprises group of fields from Company information, Assigned to User, Logged in User, Modified by User and Created by User. <b>Custom fields</b> also supported.
<b>Terms and Conditions</b>	Terms and Conditions.
<b>Current date</b>	Current date in several formats.

### 5.3.3. Labels

Labels tab consists of Global language and Module language. Labels are very useful especially in case you need to print/save documents in two or more languages.

**Labels**

---

Global language:

Module language:

Labels

Name	Description
<b>Global language</b>	Global labels.
<b>Module language</b>	Labels related only to selected module.

### 5.3.4. Product block

The product block tab allows inserting product block template and editing it. In addition, you can create your own product block using “Block start”, “Block end” and fields for products and services.

**Product block**

Product block template:

Product block:

\*Common fields for Products & Services:

\*Available fields for Products:

\*Available fields for Services:

\* fields are placed into Product block. Product block will be shown for every product/service in PDF.

**Product block**

Name	Description
<b>Product block template</b>	Insert predefined and created product block templates.
<b>Product block</b>	Products and Services Block start, Products and Services Block end. Products Block start, Products Block end. Services Block start, Services Block end. Each product block has to start with "Block start" and ends with "Block end".
<b>Common fields for Products &amp; Services</b>	Fields common for products & services. You can find same fields for products and services separately as well, but it is recommended to prefer common fields in the templates.
<b>Available fields for Products</b>	Fields for products.
<b>Available fields for Services</b>	Fields for services.

### 5.3.5. Header/Footer

The Header / Footer tab comprises some variables and header/footer settings related to displaying.

**Header / Footer**

Header/Footer variables:

Display header: **All pages**  **First page**  **Other pages**

Display footer: **All pages**  **First page**  **Other pages**  **Last page**

**Header/footer**

Name	Description
<b>Header / Footer</b>	"Current page", "Total pages" and "Page/pages".

<b>variables</b>	
<b>Display header</b>	Allows defining how to display the header of the pdf document.
<b>Display footer</b>	Allows defining how to display the footer of the pdf document.

### 5.3.6. Settings

The settings tab allows defining Description of template, page format, page settings, number format and other settings from usage of template point of view.

**Settings**

Description:

Page format:

Page orientation:

Ignored picklist values:

Margins:

Top	<input type="text" value="2.0"/>
Bottom	<input type="text" value="2.0"/>
